DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on June 15, 2007 has been entered.

2. Claims 1-11 are cancelled; claims 12-31 are currently added.

Reason for Allowance

3. Claims 12-31 are allowed and renumbered as 1-20.

4. The following is an examiner's statement of reasons for allowance:

The present invention related to an optical mouse having different illumination setting for providing different level of accuracy and power with different power level. Each independent, inter alia, claim identifies the uniquely distinct features:

As per claims 12:

wherein said illumination system has a first illumination setting for providing a first level of accuracy in said determined displacement and a second illumination setting for providing a second level of accuracy that is greater than said first level of accuracy, said second illumination setting requiring more power than said first illumination setting.

As per claim 18:

providing a first light level for providing a first level of accuracy in said determined displacement and a second light level for providing a second level of accuracy that is greater than said first level of accuracy, said second light level requiring more power than said first light level.

As per claim 23:

wherein said illumination system has a first illumination setting for providing a first level of accuracy in said determined displacement and a second illumination setting for providing a second level of accuracy that is greater than said first level of accuracy, said second illumination setting requiring more power than said first illumination setting.

The closest prior art of Aden et al. (U.S Patent No. 6,172,345) and Jung et al. (US 20020139918) show similar systems, but either singularly or in combination, fail to anticipate or render above quoted limitations obvious.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DUC Q. DINH whose telephone number is (571) 272-7686. The examiner can normally be reached on Mon-Fri from 8:00.AM-4:00.PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe can be reached on (571) 272-7691. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.
